MEMORANDUM FOR THE RECORD

SUBJECT: Career Supply Personnel Ordered to [REDACTED]

1. In order to meet the immediate requirement for Supply personnel at [REDACTED] it was determined that a portion would, of necessity, be supplied from the L/O Career Service because of the immediate need for employees and the extensive delay in obtaining clearances for military personnel.

2. The speed with which it was necessary to act to meet the personnel requirement generated by material being moved from [REDACTED] and the delays inherent in L/O Career Service Board actions necessitated that some personnel be assigned TNY while decisions as to personnel suitability and availability were being made and action taken to provide for PCS assignments. This will explain why, in some cases, personnel who were sent TNY for the purpose of meeting the immediate exigency were eventually found suitable for the assignment and were later selected as available by L/O Career Service to return to [REDACTED] in a PCS status.

3. To further support the above, it will be noted, by examination of the assignments, that certain of the personnel which could be acted on immediately and were not necessary as the initial cadre, were sent to [REDACTED] originally on a PCS basis.
